

1978 CZ Model 471 kindly given to me by a friend. Up and running after an engine rebuild but not really sure I like it enough to do a full restoration .For the moment it sits in the shed whilst I ponder what to do with it

The answer finally was do nothing as somehow it just did not compare to the build quality of the MZs. The engine was quieter and smoother at lower speeds but handling was soggy and in the end it just had to go.
